Reasons for allowance

- 1. This communication is in response to applicant's 02/22/2005 amendment in the application of Abrahamsson et al. for a "Encoding and decoding of a digital signal" filed 05/10/2001. This application claims foreign priority based on the application SE 0001728-5 filed May 10, 2000 in Sweden. The proposed amendments has been entered and made of record. Independent claims 1, 15, 29 and 30 have been amended to better point out and more distinctly claim subject matter comprising the invention.
- 6. Claims 1-30 are allowable as evident by applicant's amendment.
- The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to disclose or suggest the steps of lossless encoding the quantized digital samples through selection from a set of binary representations, the set being optimized for the prediction samples. The closest prior art of record also fails to disclose or suggest wherein table look-ups are performed with a quantized digital sample for generating two quantization region boundary levels corresponding to the quantized digital sample, wherein the levels with the common generated prediction value and another table are mapped onto a pair of likelihood values that are used for lossless encoding the quantized digital sample, wherein the table with code words is chosen among several tables with code words based upon the generated prediction sample, and the specific entry is derived as the entry corresponding to the quantization index of the quantized digital samples; wherein the encoding is performed by a multiple description encoder, which

multiple description encodes each block of the blocks of digital samples with multiple block description by performing the steps of encoding method individually for each generated block description, as recited in claims. The instant invention, in combination with the other claimed features, improves upon the Prior Art by providing a method and system for decoding of a digital signal and its block of digital samples received from a packet switched network.

- 8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is (571) 272-3149. The examiner can normally be reached Monday through Friday from 6:00 am to 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu, can be reached on (571) 272-3155. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published
